COLLECT & ALERT SOLUTION

ADVANTAGES

**Solution available on RAS & IPL**

This software feature can be installed on any Machine Access Box (RAS) or industrial routers (IPL) commercialized by Etic Telecom.

**Solution compatible with the remote maintenance and monitoring: M2Me**

Alert & Display together with the **M2Me** solution offers a comprehensive, secured and simple alert solution with Data Logger and remote maintenance of the device generating the alarm.

**Alert via SMS without cellular subscription**

The SMS Pack option enables you to send an alarm via SMS on a non-cellular Etic Telecom device having an ADSL, Wi-Fi or Ethernet WAN connectivity.

**Solution compatible with e*message**

You can also send an alarm using the e*message network (Alphapage) and receive a notification on a pager.

**Customization of the files**

You can configure the queried frequency and the number of variables. The size of the file to be stored but also its location is configurable.
